

# Please Join the Northern California Council of Camera Clubs for a Free, Two-Part Webinar

## Dates:

Part 1: Tuesday, April 13, 2021, 4:30 pm

Part 2: Tuesday, April 27, 2021, 4:30 pm

## What You'll Learn

Exploring this macro world can be simply amazing, seeing detail that is not visible to the naked eye. You'll learn how the use of flash can free you from your tripod both indoors and out, how to photograph greater than one-to-one, and explore extreme macro opportunities using a macro rail. Plus understanding lens choices and settings to get the most from your macro lens, and how to apply focus stacking in the macro world. *The first session will conclude with an assignment to be reviewed during Part 2.*

## About the Speaker

Mike Matthews's passion for wildlife as a master falconer and herpetologist drove him to become a premier macro photographer, capturing nature in its truest form. His photographs can be seen in national publications and university articles, and Mike is well known for bringing exotic reptiles and amphibians for workshop participants to photograph. He leads a variety of guided nature photography tours, birding, floral, and extreme macro workshops, and has been a keynote speaker throughout the USA on these and other topics.

## Register Now

There is no charge for these webinars, but we ask that you **register in advance for each webinar** by clicking on these links. After registering you will receive a confirmation email with the login details.
